

Mathematics Instructional Framework

KENTUCKY ADULT EDUCATION INSTRUCTIONAL FRAMEWORK SERIES INTRODUCTION

IMPETUS FOR FRAMEWORKS

The Kentucky Adult Education Instructional Framework Series was designed to provide a common instructional foundation for all of Kentucky's adult education providers. Local adult educators (who intuitively aligned instruction with college and career readiness standards, student assessment criteria, and program performance metrics) provided the impetus for this project. (In an effort to acknowledge those who inspired this work, contributions of individual Kentucky Adult Educators are signified with a pink highlight throughout the entire framework series.)

Building upon the work done by local providers, a state-level team designed the KY Adult Education Instructional Framework Series to align all instruction statewide with the LINCS Professional Development Center State Leadership Self-Assessment Tool, the LINCS Adult Education Teacher Competencies, the Data Recognition Corporation TABE 11/12 Blueprints, and the GED® Testing Service High Impact Indicators (HIIs). The result is a four-framework series comprised of:

- **The Student Framework** – Research and strategies targeted to adult student retention and persistence, aligned with LINCS AE Teacher Competencies
- **The Mathematics Instructional Framework** – Instructional resources aligned with TABE 11/12 levels and GED® HIIs
- **The Reasoning Through Language Arts Instructional Framework** – Instructional resources aligned with TABE 11/12 levels and GED® HIIs
- **The Instructional Technology Framework** – Instructional resources, accompanied by detailed screenshot and video tutorials, aligned with LINCS AE Teacher Competencies

INTENDED USES OF FRAMEWORKS

The KY Adult Education Instructional Framework Series **provides comprehensive, assessment-aligned instructional support to adult educators**. The frameworks serve as the basis for intensive, ongoing, job-embedded professional learning in the form of provider-based professional learning communities and targeted, framework-aligned, online professional learning elective courses. The four frameworks also:

- Arm instructional leaders with research-based instructional coaching resources
- Equip providers with relevant instructional technology and distance learning tools to support instruction
- Orient providers with best practice strategies for understanding, recruiting, and retaining adult students
- Prepare volunteer tutors with high-quality instructional resources to support learners

INFORMATION FOR NAVIGATING FRAMEWORKS SUCCESSFULLY

To ensure quick and easy access to resources featured in the frameworks, resources have been color-coded, as shown below:

KY Adult Education Lesson Bank Lesson (yellow highlight)

Network Resources Open College & Career (NROC) Playlist (light grey highlight)

Open Educational Resource (OER) (no highlight)

Kentucky Adult Education Educator Model Lesson Segment (pink highlight)

--------	------------------------------------

TABE Levels

The diagram consists of two rounded rectangular boxes. The top box is light green and contains a yellow circle with the letter 'L' on the left, and the text 'Beginning Literacy, NRS Level 1' and 'Grade Levels 0-1, CCRS Level A' on the right. The bottom box is a darker green and contains a yellow circle with the letter 'E' on the left, and the text 'Beginning Basic Education, NRS Level 2' and 'Grade Levels 2-3, CCRS Level B' on the right.

M

**Low Intermediate Basic Education, NRS Level 3
Grade Levels 4-5, CCRS Level C**

D

**High Intermediate Basic Education, NRS Level 4
Grade Levels 6-8, CCRS Level D**

A

**Low/High Adult Secondary Education,
NRS Levels 5 and 6
Grade Levels 9-10 and 11-12, CCRS Level E**

MATHEMATICS INSTRUCTIONAL FRAMEWORK

Kentucky Adult Education, in conjunction with the Morehead State University Adult Education Academy, is pleased to present this content framework for mathematics. In the framework, instructional materials from the [Kentucky Adult Education Lesson Bank](#), [NROC Hippocampus](#), and Open Education Resources have been aligned with both the Data Recognition Corporation (DRC) [TABE 11/12 Blueprints](#) and the GED® Testing Service [GED® High Impact Indicators](#).

[College and Career Readiness Standards for Adult Education](#) mathematical domain references:

NBT: Number and Operations in Base Ten (K-5)	A.SSE: Algebra: Seeing Structure in Expressions
NS: The Number System (6-8)	A.APR: Algebra: Arithmetic with Polynomials and Rational Expressions
NF: Number and Operations-Fractions (3-5)	A.CED: Algebra: Creating Equations
RP: Ratios and Proportional Relationships (6-7)	A.REI: Algebra: Reasoning with Equations and Inequalities
OA: Operations and Algebraic Thinking (K-5)	F.IF: Functions: Interpreting Functions
EE: Expressions and Equations (6-8)	F.BF: Functions: Building Functions
F: Functions (8)	F.LE: Functions: Linear, Quadratic, and Exponential Models

G: Geometry (K-8)	G.CO: Geometry: Congruence
MD: Measurement and Data (K-5)	G.SRT: Geometry: Similarity, Right Triangles, and Trigonometry
SP: Statistics and Probability (6-8)	G.GMD: Geometry: Geometric Measurement and Dimension
N.RN: The Real Number System	G.MG: Geometry: Modeling with Geometry
N.Q: Number and Quantity	S.ID: Statistics and Probability: Interpreting Categorical and Quantitative Data

The citation at the end of each standard identifies the CCRS grade, domain, and standard number (or standard number and letter, where applicable). So, 6.NS.6a, for example, stands for Grade 6, Number Sense domain, Standard 6a, and 5.OA.2 stands for Grade 5, Operations and Algebraic Thinking domain, Standard 2.

MATHEMATICS INSTRUCTIONAL FRAMEWORK

TABE 11/12 HIGH EMPHASIS LEVEL

[Click Here to View the Entire Kentucky Adult Education Hippocampus Mathematics Playlists](#)

LEVEL L High Emphasis

LEVEL L (AE-CCR LEVEL A)	STANDARD	STANDARD DESCRIPTION	RESOURCES
NUMBER AND OPERATIONS IN BASE TEN (40%)	1.NBT.2	Understand that the two digits of a two-digit number represent amounts of tens and ones. Understand the following as special cases: (1.NBT.2.a, 1.NBT.2.b, 1.NBT.2.c)	Place Value: Ones and Tens Whole Numbers Playlist
	1.NBT.3	Compare two two-digit numbers based on meanings of the tens and ones digits, recording the results of comparisons with the symbols $>$, $=$, and $<$.	Place Value: Ones and Tens Comparing Two Digit Numbers Playlist
OPERATIONS AND ALGEBRAIC THINKING (38%)	1.OA.3	Apply properties of operations as strategies to add and subtract. Examples: If $8 + 3 = 11$ is known, then $3 + 8 = 11$ is also known. (Commutative property of addition.) To add $2 + 6 + 4$, the second two numbers can be added to make a ten, so $2 + 6 + 4 = 2 + 10 = 12$. (Associative property of addition.)	Comparing Numbers Properties of Operations Playlist
	1.OA.7	Understand the meaning of the equal sign and determine if equations involving addition and subtraction are true or false. For example, which of the following equations are true and which are false? $6 = 6$, $7 = 8 - 1$, $5 + 2 = 2 + 5$, $4 + 1 = 5 + 2$.	Is It Equal? Understanding Equality Playlist
GEOMETRY (11%)		No High Emphasis Questions in this Category	
MEASUREMENT AND DATA (11%)	1.MD.4	Organize, represent, and interpret data with up to three categories; ask and answer questions about the total number of data points, how many in each category, and how many more or less are in one category than in another.	Let's Sort It Out Understanding and Interpreting Data Playlist

LEVEL L Medium Emphasis

LEVEL L (AE-CCR LEVEL A)	STANDARD	STANDARD DESCRIPTION	RESOURCES
NUMBER AND OPERATIONS IN BASE TEN (40%)	1.NBT.5	Given a two-digit number, mentally find 10 more or 10 less than the number, without having to count; explain the reasoning used.	Mental Math: Comparing Numbers Place Value: Ones and Tens Adding and Subtracting 10 to a Number Playlist
	1.NBT.6	Subtract multiples of 10 in the range 10-90 from multiples of 10 in the range 10-90 (positive or zero differences), using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method and explain the reasoning used.	Mental Math: Comparing Numbers Place Value: Ones and Tens Subtracting Multiples of 10 Playlist
OPERATIONS AND ALGEBRAIC THINKING (38%)	1.OA.4	Understand subtraction as an unknown-addend problem. For example, subtract $10 - 8$ by finding the number that makes 10 when added to 8.	Counting and Grouping to Add/Subtract Relating Subtracting to Addition Playlist
	1.OA.6	Add and subtract within 20, demonstrating fluency for addition and subtraction within 10. Use strategies such as counting on; making ten (e.g., $8 + 6 = 8 + 2 + 4 = 10 + 4 = 14$); decomposing a number leading to a ten (e.g., $13 - 4 = 13 - 3 - 1 = 10 - 1 = 9$); using the relationship between addition and subtraction (e.g., knowing that $8 + 4 = 12$, one knows $12 - 8 = 4$); and creating equivalent but easier or known sums (e.g., adding $6 + 7$ by creating the known equivalent $6 + 6 + 1 = 12 + 1 = 13$).	Counting and Grouping to Add/Subtract Addition and Subtraction Strategies Playlist
GEOMETRY (11%)	1.G.2	Compose two-dimensional shapes (rectangles, squares, trapezoids, triangles, half-circles, and quarter-circles) or three-dimensional shapes (cubes, right rectangular prisms, right circular cones, and right circular cylinders) to create a composite shape, and compose new shapes from the composite shape.	Composite Shapes Composite Shapes Lesson 1 Practice with Composites Creating Composite Shapes Playlist

LEVEL L (AE-CCR LEVEL A)	STANDARD	STANDARD DESCRIPTION	RESOURCES
	K.G.4	Analyze and compare two- and three-dimensional shapes, in different sizes and orientations, using informal language to describe their similarities, differences, parts (e.g., number of sides and vertices/corners) and other attributes (e.g., having sides of equal length).	Composite Shapes Composite Shapes Lesson 1 Practice with Composites Comparing Shapes Playlist
MEASUREMENT AND DATA (11%)		No Medium Emphasis Questions in this Category	

LEVEL E Medium Emphasis

LEVEL E (AE-CCR LEVEL B)	STANDARD	STANDARD DESCRIPTION	RESOURCES
NUMBER AND OPERATIONS IN BASE TEN (28%)	3.NBT.1	Use place value understanding to round whole numbers to the nearest 10 or 100.	Rounding Rounding Whole Numbers Playlist
	2.NBT.2	Count within 1000; skip-count by 5s, 10s, and 100s.	Counting and Regrouping to Add/Subtract Rounding Time Counting within 1000 Playlist
	3.NBT.3	Multiply one-digit whole numbers by multiples of 10 in the range 10 - 90 (e.g., 9×80 , 5×60) using strategies based on place value and properties of operations.	Counting and Regrouping to Add/Subtract Rounding Time Multiplying by Multiples of 10 Playlist
	2.NBT.4	Compare two three-digit numbers based on meanings of the hundreds, tens, and ones digits, using $>$, $=$, and $<$ symbols to record the results of comparisons.	Rounding Comparing Numbers Comparing 3-digit Numbers Playlist
	2.NBT.6	Add up to four two-digit numbers using strategies based on place value and properties of operations.	Rounding Addition Playlist

MATHEMATICS INSTRUCTIONAL FRAMEWORK

TABE 11/12 MEDIUM EMPHASIS LEVEL

[Link to All Kentucky Adult Education Hippocampus Mathematics Playlists](#)

LEVEL E (AE-CCR LEVEL B)	STANDARD	STANDARD DESCRIPTION	RESOURCES
	2.NBT.7	Add and subtract within 1000, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method. Understand that in adding or subtracting three-digit numbers, one adds or subtracts hundreds and hundreds, tens and tens, ones and ones; and sometimes it is necessary to compose or decompose tens or hundreds.	Whole Number Operations Addition and Subtraction Playlist
NUMBER AND OPERATIONS— FRACTIONS (12%)	3.NF.1	Understand a fraction $1/b$ as the quantity formed by 1 part when a whole is partitioned into b equal parts; understand a fraction a/b as the quantity formed by a parts of size $1/b$.	Line 'Em Up! Divide It Up! Introduction to Fractions Playlist
	3.NF.2	Understand a fraction as a number on the number line; represent fractions on a number line diagram. (3.NF.2.a, 3.NF.2.b)	Line 'Em Up! Divide It Up! Fractions on a Number Line Playlist
OPERATIONS AND ALGEBRAIC THINKING (22%)	2.OA.1	Use addition and subtraction within 100 to solve one- and two-step word problems involving situations of adding to, taking from, putting together, taking apart, and comparing, with unknowns in all positions, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem.	Addition and Subtraction Word Problems Playlist
	3.OA.1	Interpret products of whole numbers, e.g., interpret 5×7 as the total number of objects in 5 groups of 7 objects each. For example, describe a context in which a total number of objects can be expressed as 5×7 .	Word Problem Strategies Introduction to Multiplication Playlist
	3.OA.6	Understand division as an unknown-factor problem. For example, find $32/8$ by finding the number that makes 32 when multiplied by 8.	It's Party Time! Introduction to Division Playlist
	3.OA.8	Solve two-step word problems using the four operations. Represent these problems using equations with a letter standing for the unknown quantity. Assess the reasonableness of answers using mental computation and estimation strategies including rounding.	Word Problem Operations: Two Step Problems Two-step Word Problems Using the Four Operations Playlist

MATHEMATICS INSTRUCTIONAL FRAMEWORK

TABE 11/12 MEDIUM EMPHASIS LEVEL

[Link to All Kentucky Adult Education Hippocampus Mathematics Playlists](#)

LEVEL E (AE-CCR LEVEL B)	STANDARD	STANDARD DESCRIPTION	RESOURCES
GEOMETRY (10%)	2.G.1	Recognize and draw shapes having specified attributes, such as a given number of angles or a given number of equal faces. Identify triangles, quadrilaterals, pentagons, hexagons, and cubes.	The Shape of Things to Come Identify Shapes Given Their Attributes Playlist
	3.G.1	Understand that shapes in different categories (e.g., rhombuses, rectangles, and others) may share attributes (e.g., having four sides), and that the shared attributes can define a larger category (e.g., quadrilaterals). Recognize rhombuses, rectangles, and squares as examples of quadrilaterals, and draw examples of quadrilaterals that do not belong to any of these subcategories.	The Shape of Things to Come Categories of Shapes Playlist
MEASUREMENT AND DATA (28%)	3.MD.1	Tell and write time to the nearest minute and measure time intervals in minutes. Solve word problems involving addition and subtraction of time intervals in minutes, e.g., by representing the problem on a number line diagram.	Rounding Time Time Playlist
	3.MD.2	Measure and estimate liquid volumes and masses of objects using standard units of grams (g), kilograms (kg), and liters (l). Add, subtract, multiply, or divide to solve one-step word problems involving masses or volumes that are given in the same units, e.g., by using drawings (such as a beaker with a measurement scale) to represent the problem.	Math Medical Unit Conversions Volume of a Rectangular Solid Introduction to Mass and Volume Playlist
	3.MD.8	Solve real world and mathematical problems involving perimeters of polygons, including finding the perimeter given the side lengths, finding an unknown side length, and exhibiting rectangles with the same perimeter and different areas or with the same area and different perimeters.	Volume of a Rectangular Solid Real-World Perimeter and Area Introduction to Perimeter and Area Playlist

LEVEL M Medium Emphasis

LEVEL M (AE-CCR LEVEL C)	STANDARD	STANDARD DESCRIPTION	RESOURCES
MEASUREMENT AND DATA (15%)	5.MD.1	Convert among different-sized standard measurement units within a given measurement system (e.g., convert 5 cm to 0.05 m), and use these conversions in solving multi-step, real world problems.	Math Skills for Carpet and Tile Installation Math and Medical Unit Conversions Converting Units of Measurement Playlist
	5.MD.5	Relate volume to the operations of multiplication and addition and solve real world and mathematical problems involving volume. (5.MD.5.a, 5.MD.5.b, 5.MD.5.c)	Divide and Conquer Volume of a Rectangular Solid Volume Playlist
	4.MD.6	Measure angles in whole-number degrees using a protractor. Sketch angles of specified measure.	Measuring Angles Introduction to Angles Playlist
	4.MD.7	Recognize angle measure as additive. When an angle is decomposed into non-overlapping parts, the angle measure of the whole is the sum of the angle measures of the parts. Solve addition and subtraction problems to find unknown angles on a diagram in real world and mathematical problems, e.g., by using an equation with a symbol for the unknown angle measure.	Work with Angles Properties of Angles Playlist
NUMBER AND OPERATIONS— FRACTIONS (20%)	4.NF.3	Understand a fraction a/b with $a > 1$ as a sum of fractions $1/b$. (4.NF.3.a, 4.NF.3.b, 4.NF.3.c, 4.NF.3.d)	Add and Subtract Fractions Adding Fractions with the Same Denominator Playlist
	4.NF.4	Apply and extend previous understandings of multiplication to multiply a fraction by a whole number. (4.NF.4.a, 4.NF.4.b, 4.NF.4.c)	Multiply and Divide Fractions The Four Operations with Fractions for Trade Jobs Understanding Fractions Multiply a Fraction by a Whole Number Playlist
	5.NF.4	Apply and extend previous understandings of multiplication to multiply a fraction or whole number by a fraction.	Understanding Fractions Multiply a Fraction by a Fraction Playlist
	4.NF.7	Compare two decimals to hundredths by reasoning about their size. Recognize that comparisons are valid only when the two decimals refer to the same whole. Record the results of comparisons with the symbols $>$, $=$, or $<$, and justify the conclusions, e.g., by using a visual model.	Decimal Sense Comparing Decimals Playlist

MATHEMATICS INSTRUCTIONAL FRAMEWORK

TABE 11/12 MEDIUM EMPHASIS LEVEL

LEVEL M (AE-CCR LEVEL C)	STANDARD	STANDARD DESCRIPTION	RESOURCES
	5.NF.7	Apply and extend previous understandings of division to divide unit fractions by whole numbers and whole numbers by unit fractions. (5.NF.7.a, 5.NF.7.b, 5.NF.7.c)	The Four Operations with Fractions for Trade Jobs Understanding Fractions Dividing Fractions Playlist
STATISTICS & PROBABILITY (5%)	6.SP.1	Recognize a statistical question as one that anticipates variability in the data related to the question and accounts for it in the answers. For example, How old am I? is not a statistical question, but How old are the students in my school? is a statistical question because one anticipates variability in students' ages.	Statistical Questions Statistical Questions Playlist
NUMBER AND OPERATIONS IN BASE TEN (15%)	4.NBT.1	Recognize that in a multi-digit whole number, a digit in one place represents ten times what it represents in the place to its right. For example, recognize that $700 \div 70 = 10$ by applying concepts of place value and division.	Place Value Division Comparing Place Values Playlist
	5.NBT.3	Read, write, and compare decimals to thousandths. (5.NBT.3.a, 5.NBT.3.b)	Decimals Comparing Decimals to the Thousandths Playlist
OPERATIONS AND ALGEBRAIC THINKING (12%)	4.OA.1	Interpret a multiplication equation as a comparison, e.g., interpret $35 = 5 \times 7$ as a statement that 35 is 5 times as many as 7 and 7 times as many as 5. Represent verbal statements of multiplicative comparisons as multiplication equations.	Interpreting and Factoring Multiplication as Comparison Playlist
	4.OA.2	Multiply or divide to solve word problems involving multiplicative comparison, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem, distinguishing multiplicative comparison from additive comparison.	Proportions for Trade Jobs Multiplication as Comparison Playlist
GEOMETRY (10%)	4.G.1	Draw points, lines, line segments, rays, angles (right, acute, obtuse), and perpendicular and parallel lines. Identify these in two-dimensional figures.	Locate Points on the Coordinate Plane Measuring Angles Points, Lines, Line Segments, Rays, Angles, and Perpendicular and Parallel Lines Playlist
EXPRESSIONS AND EQUATIONS (15%)		No Medium Emphasis Questions in this Category

LEVEL D (AE-CCR LEVEL D)	STANDARD	STANDARD DESCRIPTION	RESOURCES
GEOMETRY (18%)	8.G.2	Understand that a two-dimensional figure is congruent to another if the second can be obtained from the first by a sequence of rotations, reflections, and translations; given two congruent figures, describe a sequence that exhibits the congruence between them.	Exponents, Roots, and Scientific Notation Intro to the Pythagorean Theorem Testing for Congruence through Transformations Playlist
EXPRESSIONS AND EQUATIONS (18%)	8.EE.2	Use square root and cube root symbols to represent solutions to equations of the form $x^2 = p$ and $x^3 = p$, where p is a positive rational number. Evaluate square roots of small perfect squares and cube roots of small perfect cubes. Know that $\sqrt{2}$ is irrational.	Square Roots and Cube Roots Playlist
RATIOS AND PROPORTIONAL RELATIONSHIPS (10%)	6.RP.3	Use ratio and rate reasoning to solve real-world and mathematical problems, e.g., by reasoning about tables of equivalent ratios, tape diagrams, double number line diagrams, or equations. (6.RP.3a, 6.RP.3.b, 6.RP.3.c, 6.RP.3.d)	Analyze Proportional Relationships (Scale Factors) Budgeting with Math Calculating Percent in Real-Life Situations Education Pays Finding the Unknown Percent, Part, or Whole for Trade Jobs Introduction to Circles Medical Math and Unit Conversions Percent and Pie Charts Percent Applications Percent Basics Proportions for Trade Jobs Ratio and Proportion: Using a Double Number Line Real-Life Proportions Real-Life Ratios and Rates Three Views of a Ratio: Using Unit Rate Understanding Ratios: Using Ratio Tables Using Proportion to Solve Percent Using Proportion to Solve Direct and Inverse Variation Rates, Ratios, and Proportions Playlist

MATHEMATICS INSTRUCTIONAL FRAMEWORK

TABE 11/12 MEDIUM EMPHASIS LEVEL

[Link to All Kentucky Adult Education Hippocampus Mathematics Playlists](#)

LEVEL D (AE-CCR LEVEL D)	STANDARD	STANDARD DESCRIPTION	RESOURCES
STATISTICS AND PROBABILITY (22%)	7.SP.4	Use measures of center and measures of variability for numerical data from random samples to draw informal comparative inferences about two populations. For example, decide whether the words in a chapter of a seventh-grade science book are generally longer than the words in a chapter of a fourth-grade science book.	Measures of Center and Variability Playlist
	7.SP.5	Understand that the probability of a chance event is a number between 0 and 1 that expresses the likelihood of the event occurring. Larger numbers indicate greater likelihood. A probability near 0 indicates an unlikely event, a probability around 1/2 indicates an event that is neither unlikely nor likely, and a probability near 1 indicates a likely event.	Probability Playlist
	7.SP.8	Find probabilities of compound events using organized lists, tables, tree diagrams, and simulation. (7.SP.8.a, 7.SP.8.b)	Analyzing Trends Probability of Compound Events Playlist
THE NUMBER SYSTEM (21%)	6.NS.5	Understand that positive and negative numbers are used together to describe quantities having opposite directions or values (e.g., temperature above/below zero, elevation above/below sea level, credits/debits, positive/negative electric charge); use positive and negative numbers to represent quantities in real-world contexts, explaining the meaning of 0 in each situation.	Absolutely Positive and Negative Numbers Introduction to Integers Playlist
	6.NS.6	Understand a rational number as a point on the number line. Extend number line diagrams and coordinate axes familiar from previous grades to represent points on the line and in the plane with negative number coordinates. (6.NS.6.a, 6.NS.6.b, 6.NS.6.c)	Multiply and Divide Integers Ordering Integers Playlist
	6.NS.7	Understand ordering and absolute value of rational numbers. (6.NS.7.a, 6.NS.7.b, 6.NS.7.c, 6.NS.7.d)	Absolutely Absolute Value Playlist
	7.NS.2	Apply and extend previous understandings of multiplication and division and of fractions to multiply and divide rational numbers. (7.NS.2.a, 7.NS.2.b, 7.NS.2.c, 7.NS.2.d)	Multiply and Divide Integers Multiply and Divide Integers Playlist

LEVEL E (AE-CCR LEVEL B)	STANDARD	STANDARD DESCRIPTION	RESOURCES
NUMBER AND OPERATIONS IN BASE TEN (28%)	2.NBT.1	Understand that the three digits of a three-digit number represent amounts of hundreds, tens, and ones; e.g., 706 equals 7 hundreds, 0 tens, and 6 ones. Understand the following as special cases: (2.NBT.1.a, 2.NBT.1.b)	Comparing Numbers Budgeting with Math Place Value Up to Hundreds Playlist
	3.NBT.2	Fluently add and subtract within 1000 using strategies and algorithms based on place value, properties of operations, and/or the relationship between addition and subtraction.	Regrouping Rounding Time Add and Subtract within 1000 Playlist
	2.NBT.3	Read and write numbers to 1000 using base-ten numerals, number names, and expanded form.	Regrouping Read and Write Numbers to 1000 Playlist
NUMBER AND OPERATIONS – FRACTIONS (12%)		No Low Emphasis Questions in this Category	
OPERATIONS AND ALGEBRAIC THINKING (22%)	3.OA.2	Interpret whole-number quotients of whole numbers, e.g., interpret $56/8$ as the number of objects in each share when 56 objects are partitioned equally into 8 shares, or as a number of shares when 56 objects are partitioned into equal shares of 8 objects each. For example, describe a context in which a number of shares or a number of groups can be expressed as $56/8$.	Understanding Division Playlist
	3.OA.3	Use multiplication and division within 100 to solve word problems in situations involving equal groups, arrays, and measurement quantities, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem.	Word Problem Strategies Multiplication and Division within 100 Playlist
	3.OA.4	Determine the unknown whole number in a multiplication or division equation relating three whole numbers. For example, determine the unknown number that makes the equation true in each of the equations $8 \times ? = 48$, $5 = \boxed{}/3$, $6 \times 6 = ?$.	Solving for Unknown Numbers in Multiplication and Division Equations Playlist

MATHEMATICS INSTRUCTIONAL FRAMEWORK

TABE 11/12 LOW EMPHASIS LEVEL

[Click Here to View the Entire Kentucky Adult Education Hippocampus Mathematics Playlists](#)

LEVEL E (AE-CCR LEVEL B)	STANDARD	STANDARD DESCRIPTION	RESOURCES
	3.OA.5	Apply properties of operations as strategies to multiply and divide. Examples: If $6 \times 4 = 24$ is known, then $4 \times 6 = 24$ is also known. (Commutative property of multiplication.) $3 \times 5 \times 2$ can be found by $3 \times 5 = 15$, then $15 \times 2 = 30$, or by $5 \times 2 = 10$, then $3 \times 10 = 30$. (Associative property of multiplication.) Knowing that $8 \times 5 = 40$ and $8 \times 2 = 16$, one can find 8×7 as $8 \times (5 + 2) = (8 \times 5) + (8 \times 2) = 40 + 16 = 56$. (Distributive property.)	Properties of Multiplication and Division Playlist
	3.OA.7	Fluently multiply and divide within 100, using strategies such as the relationship between multiplication and division (e.g., knowing that $8 \times 5 = 40$, one knows $40 / 5 = 8$) or properties of operations. By the end of Grade 3, know from memory all products of two one-digit numbers.	Multiply and Divide within 100 Playlist
	3.OA.9	Identify arithmetic patterns (including patterns in the addition table or multiplication table), and explain them using properties of operations. For example, observe that 4 times a number is always even, and explain why 4 times a number can be decomposed into two equal addends.	Patterns Playlist
GEOMETRY (10%)	3.G.2	Partition shapes into parts with equal areas. Express the area of each part as a unit fraction of the whole. For example, partition a shape into 4 parts with equal area, and describe the area of each part as $1/4$ of the area of the shape.	Composite Shapes Identifying Fractions Playlist
	2.G.3	Partition circles and rectangles into two, three, or four equal shares, describe the shares using the words halves, thirds, half of, a third of, etc., and describe the whole as two halves, three thirds, four fourths. Recognize that equal shares of identical wholes need not have the same shape.	Halves and Thirds and Fourths Playlist
MEASUREMENT AND DATA (28%)	2.MD.2	Measure the length of an object twice, using length units of different lengths for the two measurements; describe how the two measurements relate to the size of the unit chosen.	Basic Length Measurement Estimating Measurement Measuring Length Playlist
	2.MD.3	Estimate lengths using units of inches, feet, centimeters, and meters.	Estimating Measurement Estimating Length Playlist

LEVEL M (AE-CCR LEVEL C)	STANDARD	STANDARD DESCRIPTION	RESOURCES
GEOMETRY (10%)	5.G.1	Use a pair of perpendicular number lines, called axes, to define a coordinate system, with the intersection of the lines (the origin) arranged to coincide with the 0 on each line and a given point in the plane located by using an ordered pair of numbers, called its coordinates. Understand that the first number indicates how far to travel from the origin in the direction of one axis, and the second number indicates how far to travel in the direction of the second axis, with the convention that the names of the two axes and the coordinates correspond (e.5.G., x-axis and x-coordinate, y-axis and y-coordinate).	Locate Points on the Coordinate Plane Coordinate Plane Playlist
	5.G.3	Understand that attributes belonging to a category of two-dimensional figures also belong to all subcategories of that category. For example, all rectangles have four right angles and squares are rectangles, so all squares have four right angles.	Shape Attributes Playlist
	6.G.4	Represent three-dimensional figures using nets made up of rectangles and triangles, and use the nets to find the surface area of these figures. Apply these techniques in the context of solving real-world and mathematical problems.	Three-Dimensional Shapes: Area and Nets Surface Area with Nets Playlist
EXPRESSIONS AND EQUATIONS (15%)	6.EE.7	Solve real-world and mathematical problems by writing and solving equations of the form $x + p = q$ and $px = q$ for cases in which p , q and x are all nonnegative rational numbers.	Solving Addition and Multiplication One-Step Equations Playlist
	6.EE.8	Write an inequality of the form $x > c$ or $x < c$ to represent a constraint or condition in a real-world or mathematical problem. Recognize that inequalities of the form $x > c$ or $x < c$ have infinitely many solutions; represent solutions of such inequalities on number line diagrams.	Write and Solve Inequalities Playlist

MATHEMATICS INSTRUCTIONAL FRAMEWORK

TABLE 11/12 LOW EMPHASIS LEVEL

[Click Here to View the Entire Kentucky Adult Education Hippocampus Mathematics Playlists](#)

LEVEL M (AE-CCR LEVEL C)	STANDARD	STANDARD DESCRIPTION	RESOURCES
	6.EE.9	Use variables to represent two quantities in a real-world problem that change in relationship to one another; write an equation to express one quantity, thought of as the dependent variable, in terms of the other quantity, thought of as the independent variable. Analyze the relationship between the dependent and independent variables using graphs and tables, and relate these to the equation. For example, in a problem involving motion at constant speed, list and graph ordered pairs of distances and times, and write the equation $d = 65t$ to represent the relationship between distance and time.	Dependent and Independent Variables Playlist
	6.EE.2	Write, read, and evaluate expressions in which letters stand for numbers.(6.EE.2.a, 6.EE.2.b, 6.EE.2.c)	Variables Write, Read, and Evaluate Expressions Playlist
	6.EE.3	Apply the properties of operations to generate equivalent expressions. For example, apply the distributive property to the expression $3(2 + x)$ to produce the equivalent expression $6 + 3x$; apply the distributive property to the expression $24x + 18y$ to produce the equivalent expression $6(4x + 3y)$; apply properties of operations to $y + y + y$ to produce the equivalent expression $3y$.	Equivalent Expressions Playlist
	6.EE.4	Identify when two expressions are equivalent (i.e., when the two expressions name the same number regardless of which value is substituted into them). For example, the expressions $y + y + y$ and $3y$ are equivalent because they name the same number regardless of which number y stands for.	Identifying Equivalent Expressions Playlist
	6.EE.5	Understand solving an equation or inequality as a process of answering a question: which values from a specified set, if any, make the equation or inequality true? Use substitution to determine whether a given number in a specified set makes an equation or inequality true.	Variables Finding True Equations and Inequalities Playlist
	6.EE.6	Use variables to represent numbers and write expressions when solving a real-world or mathematical problem; understand that a variable can represent an unknown number, or, depending on the purpose at hand, any number in a specified set.	Variables Write Expressions from Word Problems Playlist

LEVEL D (AE-CCR LEVEL D)	STANDARD	STANDARD DESCRIPTION	RESOURCES
EXPRESSIONS AND EQUATIONS (18%)	8.EE.1	Know and apply the properties of integer exponents to generate equivalent numerical expressions. For example, $3^2 \times 3^{-5} = 3^{-3} = 1 \div 3^3 = 1/27$.	What's Your Profit? Exponent Properties Playlist
	7.EE.2	Understand that rewriting an expression in different forms in a problem context can shed light on the problem and how the quantities in it are related. For example, $a + 0.05a = 1.05a$ means that increase by 5% is the same as multiply by 1.05.	What's Your Profit? Rewrite Expressions in Different Forms Playlist
	7.EE.3	Solve multi-step real-life and mathematical problems posed with positive and negative rational numbers in any form (whole numbers, fractions, and decimals), using tools strategically. Apply properties of operations to calculate with numbers in any form; convert between forms as appropriate; and assess the reasonableness of answers using mental computation and estimation strategies. For example: If a woman making \$25 an hour gets a 10% raise, she will make an additional 1/10 of her salary an hour, or \$2.50, for a new salary of \$250. If you want to place a towel bar $9 \frac{3}{4}$ inches long in the center of a door that is $27 \frac{1}{2}$ inches wide, you will need to place the bar about 9 inches from each edge; this estimate can be used as a check on the exact computation.	Integer Word Problems Playlist
	8.EE.3	Use numbers expressed in the form of a single digit times an integer power of 10 to estimate very large or very small quantities, and to express how many times as much one is than the other. For example, estimate the population of the United States as 3×10^8 and the population of the world as 7×10^9 , and determine that the world population is more than 20 times larger.	Scientific Notation Playlist
	8.EE.5	Graph proportional relationships, interpreting the unit rate as the slope of the graph. Compare two different proportional relationships represented in different ways. For example, compare a distance-time graph to a distance-time equation to determine which of two moving objects has greater speed.	How Steep Is It? Real Life Proportions Use Graphs to Determine Slope Playlist
	8.EE.8	Analyze and solve pairs of simultaneous linear equations. (8.EE.8.a, 8.EE.8.b, 8.EE.8.c)	System of Equations Playlist

[Click Here to View the Entire Kentucky Adult Education Hippocampus Mathematics Playlists](#)

LEVEL D (AE-CCR LEVEL D)	STANDARD	STANDARD DESCRIPTION	RESOURCES
RATIOS AND PROPORTIONAL RELATIONSHIPS (10%)	7.RP.1	Compute unit rates associated with ratios of fractions, including ratios of lengths, areas and other quantities measured in like or different units. For example, if a person walks $\frac{1}{2}$ mile in each $\frac{1}{4}$ hour, compute the unit rate as the complex fraction $\frac{1/2}{1/4}$ miles per hour, equivalently 2 miles per hour.	Unit Rates and Fractions Playlist
	7.RP.3	Use proportional relationships to solve multistep ratio and percent problems. Examples: simple interest, tax, markups and markdowns, gratuities and commissions, fees, percent increase and decrease, percent error.	Real Life Proportions Multi-Step Ratio and Percent Problems Playlist
STATISTICS AND PROBABILITY (22%)	8.SP.1	Construct and interpret scatter plots for bivariate measurement data to investigate patterns of association between two quantities. Describe patterns such as clustering, outliers, positive or negative association, linear association, and nonlinear association.	Scatter Plots Playlist
	7.SP.2	Use data from a random sample to draw inferences about a population with an unknown characteristic of interest. Generate multiple samples (or simulated samples) of the same size to gauge the variation in estimates or predictions. For example, estimate the mean word length in a book by randomly sampling words from the book; predict the winner of a school election based on randomly sampled survey data. Gauge how far off the estimate or prediction might be.	Random Samples Playlist
	8.SP.2	Know that straight lines are widely used to model relationships between two quantitative variables. For scatter plots that suggest a linear association, informally fit a straight line, and informally assess the model fit by judging the closeness of the data points to the line.	Lines of Best Fit Playlist
	8.SP.3	Use the equation of a linear model to solve problems in the context of bivariate measurement data, interpreting the slope and intercept. For example, in a linear model for a biology experiment, interpret a slope of 1.5 cm/hr as meaning that an additional hour of sunlight each day is associated with an additional 1.5 cm in mature plant height.	Linear Equations and Intercepts Playlist

LEVEL D (AE-CCR LEVEL D)	STANDARD	STANDARD DESCRIPTION	RESOURCES
	8.SP.4	Understand that patterns of association can also be seen in bivariate categorical data by displaying frequencies and relative frequencies in a two-way table. Construct and interpret a two-way table summarizing data on two categorical variables collected from the same subjects. Use relative frequencies calculated for rows or columns to describe possible association between the two variables. For example, collect data from students in your class on whether or not they have a curfew on school nights and whether or not they have assigned chores at home. Is there evidence that those who have a curfew also tend to have chores?	Two Way Tables Playlist
	6.SP.5	Summarize numerical data sets in relation to their context, such as by: (6.RP.5.d)	Analyzing Trends What Does the Future Hold? Measures of Center and Variability Playlist
	7.SP.7	Develop a probability model and use it to find probabilities of events. Compare probabilities from a model to observed frequencies; if the agreement is not good, explain possible sources of the discrepancy. (7.SP.7.a, 7.SP.7.b)	Analyzing Trends Employability Skills Lesson 4 Mean, Median, Mode, Range Probability Models Playlist
THE NUMBER SYSTEM (21%)	6.NS.8	Solve real-world and mathematical problems by graphing points in all four quadrants of the coordinate plane. Include use of coordinates and absolute value to find distances between points with the same first coordinate or the same second coordinate.	Location, Location, Location: Navigating the Coordinate Plane Graphing Points on a Coordinate Plane Playlist
	8.NS.2	Use rational approximations of irrational numbers to compare the size of irrational numbers, locate them approximately on a number line diagram, and estimate the value of expressions (e.g., π^2). For example, by truncating the decimal expansion of $\sqrt{2}$, show that $\sqrt{2}$ is between 1 and 2, then between 1.4 and 1.5, and explain how to continue on to get better approximations.	Approximations of Irrational Numbers Playlist
FUNCTIONS (11%)	8.F.3	Interpret the equation $y = mx + b$ as defining a linear function, whose graph is a straight line; give examples of functions that are not linear. For example, the function $A = s^2$ giving the area of a square as a function of its side length is not linear because its graph contains the points (1,1), (2,4) and (3,9), which are not on a straight line.	Funky Equations of the Line Y=MX + B Funky Town Festival Linearity Playlist

[Click Here to View the Entire Kentucky Adult Education Hippocampus Mathematics Playlists](#)

LEVEL A Low Emphasis

LEVEL A (AE-CCR LEVEL E)	DOMAIN/ STANDARD	STANDARD DESCRIPTION	RESOURCES
GEOMETRY (15%)	G.CO: Congruence/ G.CO.1	Know precise definitions of angle, circle, perpendicular line, parallel line, and line segment, based on the undefined notions of point, line, distance along a line, and distance around a circular arc.	Things that are Round Defining Angles, Circles, Perpendicular and Parallel Lines, and Line Segments Playlist
NUMBER AND QUANTITY (13%)	N.Q: Quantities/ N.Q.3	Choose a level of accuracy appropriate to limitations on measurement when reporting quantities.	Using Reasonable Rates Playlist
ALGEBRA (28%)	A.SSE: Seeing Structure in Expressions/ A.SSE.1a	Interpret parts of an expression, such as terms, factors, and coefficients.	Parts of an Equation: Terms, Factors, and Coefficients Playlist
	A.SSE: Seeing Structure in Expressions/ A.SSE.2	Use the structure of an expression to identify ways to rewrite it. For example, see $x^4 - y^4$ as $(x^2)^2 - (y^2)^2$, thus recognizing it as a difference of squares that can be factored as $(x^2 - y^2)(x^2 + y^2)$.	Factoring a Difference of Squares Playlist
	A.SSE: Seeing Structure in Expressions/ A.SSE.3a	Factor a quadratic expression to reveal the zeroes of the function it defines.	Roots and Vertex of Quadratic Equations Playlist
	A.CED: Creating Equations/ A.CED.1	Create equations and inequalities in one variable and use them to solve problems. Include equations arising from linear and quadratic functions, and simple rational and exponential functions.	Adding Polynomials Factoring Polynomials Multiply Polynomials Subtracting Polynomials Creating One Variable Equations Playlist
	A.CED: Creating Equations/ A.CED.2	Create equations in two or more variables to represent relationships between quantities; graph equations on coordinate axes with labels and scales.	Creating Two Variable Equations Playlist
	A.REI: Reasoning with Equations and Inequalities/ A.REI.1	Explain each step in solving a simple equation as following from the equality of numbers asserted at the previous step, starting from the assumption that the original equation has a solution. Construct a viable argument to justify a solution method.	Steps to Solve Simple Equations Playlist

MATHEMATICS INSTRUCTIONAL FRAMEWORK
